The Express AM44 is a highly-powerful satellite with good coverage of Europe and the Middle East. Located at 11°W, this satellite is a good choice for TV distribution and contribution services.

ST1 Ku-band

Whether you are broadcasting live video or backhauling production content between your studios, Romantis Occasional Use capacities will ensure seamless coverage from South America to the Far East. You can transmit breaking and scheduled news events, provide coverage of major sporting and political events when and where it is necessary. The Occasional Use (OU) booking can be as short as 15 minutes or can last for as long as several weeks or months.
